LOWER MAMMOTH TAPS FINE ORE

Worth of Strike Is as Yet Undetermined.

WILL SINK TO 1,200 LEVEL

MAY DAY PLANS.

Colorado River Region.

Prove, April 11.—Last summer Roy Woolley and Eugene Roberts of this city took a trip to the Colorado river region with a party of eastern educators who were here. It seems that the boys made the trip profitable in a material sense as well as from an intellectual and scientific point of view.

While away they located some copperclaims near Point Sublime, about seventy miles from Kanab, and brought samples with them. These have been assayed, both here and in Boston, and show 55 percent copper. As there are smelters in course of erection within about sixty miles of the claims, at Coconino and at Potoska, the prospects for working the

ore at a profit are favorable, and just as soon as the snow makes it possible development work will be prosecuted. The ciaims show a four-foot vein of this 55 per cent ore on the surface.

The owners are Roy Woolley, Eugene Roberts and John Cram of Utah and Augustus Cobb of Boston, a student of Harvard, who was of the party.

RICH COPPER FIND.

Educators Make Rich Discovery in

Colorado River Region.

Provo, April 14.—Last summer Roy
Woolley and Eugene Roberts of this city
took a trip to the Colorado river region
with a party of eastern educators who

Stocks that are Worth Buying

Are those now paying dividends or about to begin. A mine that has been worked for years and has never made any money for its shareholders is a discouraging proposition. Of course, it takes a little time to develop a mine, but if it is not developed with three years' steady work, begin to get your money out and put it somewhere else. You will find this a good rule. There may be exceptions, but people that hunt the exceptions, and hunt then hard, will go broke before they find them. There are plenty of good investments, including these: Daly-West, Naildriver, Sacramento, Park Summit, and as a speculation, "Aristocrat" for Park City at 4½ cents a share. I have got it.
